How can **1VP** ensure product quality compliance without creating friction for vendors?

Use AI to Analyze

Phase 2: AI-based quality checks with Applitools

Easy Submission

1 Phase 1: Collect compliance documents via DigiLocker

Use AI to Check Ratings

3 Phase 3: Continuous rating-based quality assessment

Revolutionizing Supplier Quality with AI & Digital Innovation

The graphic features a yellow and white background with a faint world map. At the top left are the logos for the Ministry of Electronics & Information Technology, Government of India, Digital India, and EntityLocker. The EntityLocker logo includes the tagline 'Document Wallet to Empower Entities'. Below the logos, the title 'What is an Entity' is written in blue. A paragraph defines an entity as any organization, including companies, firms, associations, partnerships, public bodies, MSMEs, large businesses, and charitable trusts. A yellow banner states that EntityLocker is designed to efficiently manage documents in a digital format. On the left, a QR code is shown with the text 'Scan to know more'. On the right, an illustration depicts a man in a suit presenting to a woman sitting at a desk with a laptop and a large screen.

- **Applitools AI** automatically **analyzes vendor documents** and details to assess **product quality** efficiently.
- Ensures that products meet quality standards before approval.
- Streamlines the vendor evaluation process with intelligent document analysis.
- Helps **1VP** effortlessly verify **supplier quality**, reducing manual effort.

Enhancing Supplier Accountability with Buyer Insights & Ratings

Encouraging Quality & Performance

Regular feedback helps suppliers understand areas where they need to improve, ensuring consistent quality and service.

Building Trust & Transparency

Honest ratings create an open communication channel, strengthening buyer-supplier relationships.

Driving Continuous Improvement

Constructive criticism allows suppliers to innovate and refine their processes.

Enhancing Competitiveness

Good ratings incentivize suppliers to maintain high standards, while poor ratings push them to rectify issues.

Risk Mitigation

Buyers can assess supplier performance before making decisions, reducing the risk of unreliable partnerships.

1VP's Guide to Effectively Utilizing Buyer Feedback & Ratings

Constructive Feedback Instead of Just Ratings

Enable supplier **responses to feedback**, encourage **private feedback** for improvement, and provide **actionable insights** beyond numerical ratings.

Reward & Recognition for Good Performance

Reward **high-performing suppliers** with badges, **discounted fees/visibility**, and a tiered recognition system, (e.g., Silver, Gold, Platinum suppliers) to motivate consistent performance.

Fair Dispute Resolution

Provide a **neutral review dispute process** for unfair ratings and delay **instant rating drops** to allow suppliers time for issue resolution.

AI-Driven Personalized Insights

Use AI for **tailored supplier recommendations** (e.g., "80% of buyers prefer faster response times—improving this could increase orders by 20%") and provide **comparative performance analytics**.

Encouraging Buyer-Supplier Collaboration

Enable **pre-rating buyer-supplier communication** and use **guided review prompts** for constructive feedback.

Through this **1VP** ensures **vendor retention, satisfaction, and long-term success** while maintaining accountability.
